

CAPSULE SUMMARY
BA-2978
345 Eudowood Lane
East Towson, Baltimore County
Circa 1910
Private

The dwelling at 345 Eudowood Lane was constructed circa 1910 in the East Towson neighborhood of Baltimore County. The history of East Towson dates from the purchase of one-and-a-quarter acres of land by Daniel Harris in September 1853. This is believed to be the first documented African-American landholding in Towson, and is among the oldest such ethnic enclave in Baltimore County. Further, manumitted slaves and/or descendants of former slaves, many of who were owned by Charles Ridgely, populated the neighborhood. Hampered by the low economic status of the residents, development in the 19th century was slow, increasing after the turn of the 20th century. The setting of the property, building styles, and construction materials were guided by the limited economic status of the residents and their desire to establish a neighborhood of their own without the assistance of white architects, builders, and craftsmen. By 1927, the community was ninety-five percent improved with single-family dwellings, social buildings, a school, and religious structures.

Fronting southwest on a level grassy lot with a paved driveway, this dwelling fronts close to the road and is surrounded by mature trees and shrubs. It is located at the corner of Hillen Road and Eudowood Lane with a large power plant located to the rear of the property. Sitting on a solid parged brick foundation, the wood frame bungalow is one story high with a cross gable roof and a shed roof extension covering the front porch. The full-width porch is supported with square wood posts, square wood balusters, and rests on a concrete block pier with cinderblock infill foundation. The wood porch floor appears to be original. The façade is three bays wide with a center entry accessed by a non-historic single-leaf panel wood door with a fanlight. Two 1/1 double-hung vinyl sash windows with square-edged surrounds covered with aluminum flank the entrance. Two center-interior parged brick chimneys rise above the asphalt shingle roof. The house is re-clad with vinyl siding and the roof features overhanging eaves and a boxed cornice encased in aluminum.

Evaluation for:

☐ National Register☐ Maryland Register☒ not evaluated

Prepare a one-paragraph summary statement of significance addressing applicable criteria, followed by a narrative discussion of the history of the resource and its context. (For compliance projects, complete evaluation on a DOE Form – see manual.)

The house at 345 Eudowood Lane was constructed circa 1910 in the East Towson neighborhood of Baltimore County. East Towson is associated with events that have made a significant contribution to the broad patterns of our history, specifically the pre-Civil War development of an African-American neighborhood in a predominately white community. The history of this property dates from the purchase of one-and-a-quarter acres of land by Daniel Harris in September 1853. This is believed to be the first documented African-American landholding in Towson, and is among the oldest such ethnic enclave in Baltimore County. Further, manumitted slaves and/or descendents of former slaves, many of who were owned by Charles Ridgely, populated the neighborhood. Hampered by the low economic status of the residents, development in the 19th century was slow, increasing after the turn of the 20th century. The setting of the property, building styles, and construction materials were guided by the limited economic status of the residents and their desire to establish a neighborhood of their own without the assistance of white architects, builders, and craftsmen. By 1927, the community was ninety-five percent improved with single-family dwellings, social buildings, a school, and religious structures. Many of the current homeowners and tenants living in the neighborhood are descendents of the first African-American residents.

East Towson as a whole is representative of an important phase of architectural development in Baltimore County, illustrating the dilution of popular architectural styles to more efficiently meet the needs of the neighborhood, and the builders' untrained abilities to execute the fashionable ornamentation. Thus, East Towson provided lower cost housing in a more suburban neighborhood, rather than the urban setting their economic status typically perpetuated.
